Step-1 : Asuume role from CMB-NP AWS 729642621935

aws sts assume-role --role-arn arn:aws:iam::729642621935:role/Vz-Camp_R --role-session-name test-cert

Step-2 : export keys generated out of step-1. (FYI — don't try this I have obfuscated keys in this email )

export AWS_ACCESS_KEY_ID="ASIAJLXKRMQ33CLDIYQ"
export AWS_SECRET_ACCESS_KEY="GU/oH31CP7T8zM+8Lei+DtO6hEbxAOS3bFN8NW"
export
AWS_SESSION_TOKEN="FQoDYXdzEJD//////////wEaDNnYFihr4cpjjMUEqSLMAQInpgMPuGj8ncsDFRwlXhPTscU1
sw94/yz5htXxFGVFFrCy/33YXgQGapzS1kUbVrzeonr1EeG3lVyxgYDa8atd/3UzPNdayY8Hsq3gh5CCMbpIdEM/aQc
aoIMrH5Rj7Gow6NV5BMuBN8RKTVszy+tcCW/hZP+Zz0gd23NhZln/lMCeF4ziR34YLSeBFNRYn28YOmfbL4Ukv3r/
P3em8thuikpgNTA086A/FRKIqrdvgcs32h4yBzJGg4cuppv1HuhI7/rNUDZrSiporTOBQ==="

Step-3 : import certificate in CMB-NP. Successful import should give ARN.

aws acm import-certificate --certificate file://roletest_ebiz_verizon_com.pem --certificate-
chain file://DigiCertCA2.pem --private-key file://roletest.ebiz.verizon.com.key.pem

{
"CertificateArn": "arn:aws:acm:us-east-1:729642621935:certificate/269355af-1113-4336-b9dd-c0bcec7e21c3"
}
